SUMMARY

Full-Stack Developer with hands-on experience in building real-time chat applications, multi-role dashboards, retail management systems, and appointment booking platforms. Skilled in developing scalable, responsive, and user-friendly applications using modern web and desktop technologies including React, Electron, Python, and SQL/NoSQL databases. Experienced in collaborative development environments and delivering efficient solutions for real-world business applications.

TECHNICAL SKILLS

Frontend: React.js, TypeScript, Redux, Tailwind CSS, SCSS, Ant Design

Backend: Python, Flask, Express.js

Desktop Development: Electron.js

Databases: MySQL, MongoDB, Firebase, SQLite

Tools & Platforms: VS Code, Git, GitHub, Firebase, Razorpay Integration

Other Skills: Agile Collaboration, Version Control, REST APIs, MS Office (Word, Excel)

PROJECTS

Retail Shop Management System – Desktop Application (Full Stack)

FEB 2026

Developed a fully offline retail management desktop application for handling billing, inventory, sales, and user management in retail stores.

- Built a cross-platform desktop application using Electron and React.
- Integrated SQLite for fast and reliable offline data storage.
- Implemented billing and sales management with item size variations, discount handling, and dynamic price calculation.
- Developed purchase and inventory modules to track stock movement and supplier purchases.
- Built a dynamic module-based access control system allowing Super Admins to define custom permissions.
- Implemented customer management and purchase history tracking.
- Added product label generation and printing functionality.
- Designed modular architecture for maintainability and scalability.

Tech Stack: Electron.js, React.js, SQLite, JavaScript, Tailwind CSS

Milk Vending App – [Full Stack Collaborative Project](#)

JUN 2025

Developed an online milk ordering platform with multiple role-based user systems.

- Implemented five user roles: Super Admin, Admin, Vendor, Distributor, and Customer.
- Built dashboards for managing inventory, delivery routes, and order slots.
- Implemented delivery tracking and status updates for distributors.
- Designed role-based authentication and authorization.

Tech Stack: React.js, FastAPI, SQLAlchemy, SCSS, Ant Design

Doctor Appointment Booking App (Full stack) - [Live link](#)

DEC-2025

- A platform for creating and managing doctor's Appointments, with core features like booking, Payment, Admin Panel, Doctor Panel and user Interface.
- Technologies used :- React JS, Express JS, Mongo DB, Tailwind CSS.
- Payment Gateway :- Razor Pay.

ChatsApp – RealTime Chat Application (Full Stack) - [Collaborative Project](#)

NOV-2025

- Developed a full-stack real-time chat application using React.js, Tailwind CSS, and Firebase, enabling seamless one-to-one messaging.
- Integrated Firebase Authentication for secure login/logout functionality and personalized user sessions.
- Implemented real-time messaging and image sharing via Firebase Firestore and Storage, ensuring smooth user communication.
- Built dynamic user status tracking (online/offline) and friend search features to enhance social interactivity.
- Collaborated in a team environment, contributing to UI design, state management, and Firebase integration.

EDUCATION ,INTERNSHIPS AND SHORT COURSE

React Developer - Frontend Engineering
M-GURU - Vilankurichi, COIMBATORE

MAR-JULY 2025

Python Full Stack Development
IDMTECHPARK-GANDHIPURAM , COIMBATORE

JULY-FEB 2025

Bachelor of Science in Computer Science (CGPA -7.4)
BISHOP AMBROSE COLLEGE - BHARATHIAR UNIVERSITY

JUN 2021-JUN-2024
